# AWS re/Start

## Overview

The Amazon Web Services re/Start skills bootcamp includes learning about cloud foundations, networking, python programming, databases and the AWS services both through theory lessons and lab sessions.

You will also get the chance to take part in two capstone projects to put your skills to the test, as well as a commercial project provided by one of our partner organisations.

This course also gives you career support to prepare you for an interview and a tech career after the course in a number of junior tech roles.

## What will I learn on this Skills Bootcamp?

The Essentials of Cloud computing, Linux, Networking, Network security, Python programming, Databases, and AWS services.

You will have the opportunity to use the skills you learn in practical labs, capstone and commercial projects.

We will also prepare you and support you to get a new role in the tech industry through supporting your personal development and a guaranteed interview with a local employer.

Once you sit and pass your final exam, you will be a qualified AWS Cloud Practitioner.

## Modules covered

Modules you will learn:

- Introduction to and cloud foundations
- Linux
- Networking
- Python programming
- Databases
- AWS services
- Personal development
- Career preparation

## How is the Skills Bootcamp delivered?

This is a full time 12-week programme with 10 weeks of taught content and two weeks of project completion.

There is a further two weeks of optional exam support after the initial 12 weeks.

It will be delivered fully virtually; however, there will be a possibility for some hybrid learning.

## Am I eligible to take part?

The course is fully funded and open to residents of the North West aged 19 or over, who are either in-work, looking for work, or have been unemployed for 12 months or less.

## Chung Tran

MPhys Data Analyst at Neumind  
Graduate AWS Re/Start

Enrolling on this skills bootcamp was probably one the best risks I could have taken in the period of rapidly emerging technologies. The engineering and personal skill during the course has provided me with an ample amount of opportunities and has allowed me to pursue areas that I find truly valuable.

The skills bootcamp provides a prime focus of providing leverage to all its students in the broad field of IT. I am thankful for being in an environment where I can flourish with other like-minded individuals from a diverse range of backgrounds.

# WHAT COMES NEXT?

With this qualification, you can go into careers in Software Engineering, Software Development, Cloud, Software Testing, Data Science or Analytics, IT Help Desks, Networking and much more.

If you don't feel ready to become a fully pledged Junior in any of these areas, we also offer the possibility of continuing onto a level 4 apprenticeship in Network Engineering, Software Development, Cyber Security or Data Analytics, depending on your previous qualifications.

## About Skills City and IN4.0 Academy

In collaboration with AWS, Skills City and the IN4.0 Academy have been delivering AWS re/Start bootcamps for over a year.

Our team includes AWS accredited instructors and experienced facilitators to give our students the best chance of gaining their qualification and progressing into tech careers.

We also work with the Tree of Knowledge to deliver personal development and our IN4.0 Talent team to support with career progression.

## About HOST

Skills City is based at HOST, the Home of Skills & Technology at MediaCityUK. Established in 2012 by Salford City Council, it has played a major role in establishing Greater Manchester as a leading digital city region.

Skills City as part of HOST comprises leading digital technology skills bootcamps. Working in collaboration with employers at all levels, we connect you to the most dynamic and innovative organisations in the North West. Skills City aims to break the barriers faced by those from underrepresented and disadvantaged backgrounds, by fast-tracking 450 people into careers in digital technology every year.

### Kelsey Brooks

AWS re/Start  
Technical Skills  
Coordinator and  
AWS Teaching Assistant

Kelsey joined our first cohort as an Audio Engineering graduate, who due to the pandemic, struggled to find employment. After successfully completing AWS re/Start Skills Bootcamp, Kelsey joined the IN4.0 Group team where she gained further AWS qualifications. She now helps with teaching on the AWS re/Start Skills Bootcamp.

### Sufian Kaki Aslam

Senior IoT Solutions  
Architect and Technical  
Training Instructor  
AWS re/Start

Sufian has taught hundreds of learners from our AWS re/Start Skills Bootcamp. Be it new learners or experienced professionals, they have agreed that the program has elevated them to new heights in mastering some of the most highly on-demand digital skills.
