

SKILLS CITY

Fair Access to Technology Futures

Skills Bootcamp:

Data Analytics

Kickstart your tech career through our Skills Bootcamp

About the course

This skills bootcamp, delivered in partnership with our industry partners is designed to help people with little prior tech knowledge to enter the workforce as skilled Data Analysts specialist.

This course is designed to be platform agnostic so we won't be teaching you to use specific technology, but we will be teaching you the skills to complete data analytics in general using any platform.

The course is delivered virtually so you will require a computer with the ability to run video conferencing software and with a camera and microphone attached.

While the course is platform agnostic some parts may require you to be able to access a spreadsheet software such as Microsoft Excel or Google Sheets.

The course will give you the ability to build your skills and use them on at least one client-facing project which you will then be able to list on your CV's and discuss with potential employers to show your real world abilities.

As well as the projects you will complete homework tasks, labs and knowledge checks to prepare you for your exam in the last two weeks of the course.

Course modules:

- ▶ Data Concepts and Environments
- ▶ Data Mining
- ▶ Data Governance, Quality, and Controls
- ▶ Employability and Personal development
- ▶ Data Analysis
- ▶ Visualization
- ▶ Course projects

Qualifications:

You can gain CompTIA Data+ (DA0-001)

Skills developed:

- ▶ Develop competency of labs in sandbox environments so that you get "hands-on" experience.
- ▶ Through participation in client facing projects, you will work towards a brief to further develop your personal and technical skills.
